Hey, my name's Oscar i'm 19 years old. I'm a passionate self-taught professional for technology... I love studying computer science and software development. Besides, i like so much studying things like: mathematics, physic, stadistics, music, body language, mnemonics and how the human brain works. I'm fast learner. When i was 13 learned my second language, english. I've competed in competitions of various disciplines as local as nationally, where my team and my have obtained the victory. Continuous improvement practitioner. I believe firmly that with discipline and determination we get make possible the impossible.
